Education

Vishwakarma Institute of Technology Pune

Bachelor of Technology in Computer Science (GPA: 8.71 / 10.00)

Aug 2022 - May 2026

Pune, Maharashtra

- **Coursework:** DSA (Python), MERN Stack, Computer Networks, DBMS, LLM's

Experience

BMC Software

Technical Analyst Intern

Jan 2025 – June 2026

Pune, Maharashtra

- **Part-time Intern (Jan 2025 – Dec 2025)**

- * Participated in structured technical training covering Linux, SQL query development, Docker containerization, and core Computer Networking principles.

- **Full-time Intern, Onsite (Jan 2026 – Jun 2026)**

- * Selected to continue as a full-time onsite intern based on performance and contributions during the part-time internship.

Publications/Achievements

- Winner (3rd Place): Business and System Innovation Challenge 2024, Indonesia: **Developed an anti-plagiarism software prototype for Binus University, Indonesia**
- Patent Published for **Hybrid Routing Emergency Mesh Network System For Disaster Communication**: A decentralized communication system enabling real-time connectivity using hybrid mesh routing.
- Publications in **Springer (Scopus Indexed)** and **IEEE Xplore**:
 - **"Image Forgery Detection Using Machine Learning"**, 8th International Conference on Smart Trends in Computing and Communications (SmartCom'24), Springer, 2024. 
 - **"Vakya: An Intelligent Framework for Automated Research Synthesis and Conference Recommendation"**, International Conference on Smart and Future Technologies (ICSFT 2026), IEEE, 2026.

Projects

 **Vakya** | *React.js, FastAPI, MongoDB, Python SDK, LLM APIs*

- Designed and built an intelligent research synthesis platform that analyzes GitHub codebases and automatically generates structured, conference-style research paper drafts using LLMs and code understanding pipelines.
- Implemented automated repository parsing, architecture understanding, section-wise paper generation, and citation-aware content structuring.
- Added a conference recommendation module to match generated papers with relevant venues based on scope, domain, and content.

 **Mesh-Up** | *ESP8266, Java, Android Studio*

- A decentralized mesh network enabling communication without traditional infrastructure like Wifi and Mobile Data, using IoT devices, laptops, and mobiles. It features UDP-based messaging, rebroadcasting, and flood protection for reliable and efficient communication.
- Designed for disaster recovery, remote areas, and events, it ensures real-time connectivity when infrastructure is unavailable.

Technical Skills

Languages: React Native, C, Java, SQL, Python, Git, Arduino, Android, Solidity

Web Development: MERN Stack, JavaScript, HTML, CSS

Operating Systems / Frameworks: CentOS Linux, Docker (Containerization and Deployment)

Volunteering Experience

Microsoft Learn Students Club VIT Pune

Jan 2024 – May 2025

Core Board Member and Web Developer

Pune, Maharashtra

- Organized a 24-hour offline National hackathon at VIT Pune.
- Built an NGO website to enhance outreach and streamline donations.
